

Sandvik TH663i Ore Truck

Fosterville Gold Mine currently owns and runs nine Sandvik TH663i Ore Trucks – worth \$1.9mil each – which carry ore from underground to the surface for processing.

Length: 11.58m

Weight: 43 tonnes
which is equivalent to
43 double cab utes!

Speed:
travels up to
10km/h full loaded

At full speed
the truck will only
travel at 25 km/h

Do the maths ...

FGM's nine ore trucks do an average of 10 trips per day. If each truck carries 60 tonnes of ore per trip, which contains around 35 ounces of gold, how much gold could be transported from underground each day?

And for those who really love crunching numbers:
If 35 ounces of gold is worth around \$85,000, how much is the day's ore worth?

Ask one of our team for the answers.
